📍 Warsaw

I have over three years of commercial experience as a front-end developer. During this time I have refined my skills working with React, utilizing technologies such as Ionic, CSS, and REST API. When creating websites and applications I pay great attention to detail to ensure that the final product meets the client's expectations and it is of the highest quality. I am remarkable at paying attention to details and have a precise approach to executing each task.

EXPERIENCE

Billog Studio 2021 - currently Junior Front-end Developer

I am participating in team projects, developing and improving products and services, implementing new technologies and tools. I am responsible for designing, implementing, testing software and introducing improvements. I am managing projects from a technical perspective, maintaining existing code and resolving issues related to the application's functionality.

Rekeep Poland 2020 - 2021 Junior IT Specialist

I specialized in monitoring computer networks and troubleshooting hardware and software issues. I provided technical support for users, including remote work, system updates and configuration in compliance with security policies.

EDUCATION

2014 - 2017 University of Łódź

Faculty of Physics and Applied Informatics
